VISHNU KUMAR

AI Software Engineer | Backend, REST APIs & LLM Systems

Agra, Uttar Pradesh, India | +91 90278 72285 | dev.vishnu.git@gmail.com | github.com/HelloVishnu04

PROFESSIONAL SUMMARY

Final-year B.Tech Computer Science student (2027 batch) applying for the AI Software Engineer Intern role. Builds backend systems, REST APIs and LLM-powered products from scratch in Python and JavaScript/TypeScript. Experienced with FastAPI, Flask, Django REST Framework and Node.js; with LLMs (a GPT-style transformer built from scratch), AI APIs (OpenAI API, LangChain, Hugging Face) and vector databases (FAISS, ChromaDB). IBM SkillsBuild AI/ML intern, OCI Data Science Professional, 2nd place at Hack The Box TechTrix.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL

Backend & APIs: Backend Development, REST API Design, FastAPI, Flask, Django REST Framework, Node.js, Microservices, WebSockets, JWT Authentication

LLMs & AI APIs: LLMs, Transformer Architectures, OpenAI API, LangChain, Hugging Face, Vector Databases (FAISS, ChromaDB)

Databases: SQL, PostgreSQL, MySQL, MongoDB, Redis

Machine Learning: TensorFlow, Keras, Scikit-learn, XGBoost, Pandas, NumPy, PySpark, Bidirectional LSTM, Random Forest

Frontend: React, MERN Stack, HTML/CSS

DevOps & Cloud: Docker, Git, GitHub Actions (CI/CD), Linux, MLflow, AWS, Oracle Cloud Infrastructure (OCI)

PROFESSIONAL EXPERIENCE

AI/ML Virtual Intern | IBM SkillsBuild (PBEL Program) | Jun 2026 – Aug 2026

Project: Recon, Cybersecurity Threat-Intelligence Platform

- Architected a full-stack threat-intelligence system that ingests network traffic and serves a Random Forest classifier detecting 5 attack categories through a production REST API.
- Built automated Python data pipelines (Pandas, Scikit-learn) with feature scaling, missing-value imputation and correlation-based feature selection on high-dimensional telemetry.
- Delivered a dual-server backend: FastAPI inference API with Swagger documentation plus a Flask dashboard, with pickle-based model versioning, shipped in a 2-month agile sprint.

PROJECTS

GPT LLM Playground (2026) | Python, TensorFlow, LLMs, Transformers

- Built a GPT-1-style large language model from scratch, implementing attention and tokenization, the mechanics behind modern generative AI systems.
- Created modular data preprocessing, training and inference pipelines for reproducible experiments and rapid iteration on model architecture.

SentiScan: NLP Sentiment Engine (2025) | Python, Flask, Bidirectional LSTM, REST API

- Designed and deployed a Flask backend microservice serving a Bidirectional LSTM sentiment model with 92.4% accuracy across 50K real-world reviews.
- Exposed low-latency, real-time REST API endpoints for live text-sentiment scoring.

S.A.F.E.: Real-Time AI Pipeline (2026) | Python, TensorFlow, REST API

- Built a real-time ingestion-to-inference pipeline with automated model training, versioning and scalable REST API deployment.

MediPredict: ML Recommendation Engine (2025) | Scikit-learn, XGBoost, Streamlit

- Automated model selection across 7 medical prediction domains, reaching 91.3% mean accuracy with ensemble logic, and built an interactive Streamlit interface for explainable health-risk predictions.

EDUCATION

B.Tech in Computer Science | Anand Engineering College, Agra (AKTU) | 2023 – 2027 (Expected)

Intermediate (PCM) and High School (Science) | Shri Narsingh Bhagwan Inter College, Agra | 2020 – 2022

CERTIFICATIONS

- Oracle Cloud Infrastructure (OCI) Data Science Professional | Oracle | 2025
- Exploratory Data Analysis, Gold Certification (NSQF Level 5) | NASSCOM FutureSkills Prime, MeitY, Govt. of India | 2026
- SQL Certificate (Intermediate) | HackerRank | 2024

ACHIEVEMENTS

- 2nd Place, Hack The Box TechTrix Cybersecurity Competition; Top 5 Finalist (Pan-India), Virtual Lab Hackathon.
- Solved 200+ DSA problems on LeetCode and HackerRank, focused on algorithm optimization (dynamic programming, graph algorithms).
- Maintains 24+ public GitHub repositories spanning full-stack, machine learning and systems projects (github.com/HelloVishnu04).
